

T5-001

Challenges in deriving greenhouse gases from hyper-spectral thermal sounders

Eric Maddy (Camp Springs/US)

T5-002

Change point analysis of the sources and sinks of atmospheric CO₂

Claudie Beaulieu (Princeton/US)

T5-003

Development of a spectral albedo simulator for the Jules model

Marianne Hall (Swansea/UK)

T5-004

Factors influencing greenhouse gases (CO₂, N₂O AND CH₄) fluxes in Mediterranean-forest ecosystem in southern Portugal

Alla Shvaleva (Lisboa/PT)

T5-005

Parametric uncertainty of a terrestrial vegetation model

Kaoru Tachiiri (Yokohama/JP)

T5-006

Water use efficiency as a MEANS to assess forest carbon uptake for different management strategies

Maj-Lena Linderson (Roskilde/DK)
